

The LSI Accredited Credentialing Register award; for NHS - life science industry collaboration in delivering healthcare

Sponsored by the Academy for Healthcare Science

This award aims to raise the profile of the contribution of life science industry representatives to the effectiveness and efficiency of the health services. The LSI Credentialing Register provides a not-for-profit registration system that has patient and public safety at its heart – providing reassurance to patients and the NHS. Nominations are welcome from individual representatives who can demonstrate how they have developed their collaboration in delivering healthcare. This could include, but is not limited to, educational initiatives, promoting understanding of their role, and activities that play a part in delivering improved patient care and supporting clinical staff.

Criteria:

Nominees must be working in the life sciences industry within the UK and show evidence of:

- measurable achievements in effective collaboration within the NHS
- initiatives which improve patient care or contribute to service efficiency and effectiveness
- leadership and team working.

Submission statements

1. Why should the nominee be considered for this award and what are their achievements? (100 words)
2. How have they raised the profile of their work and contributed to improving patient care? (100 words)
3. How does the nominee demonstrate leadership and team working skills? (100 words)
4. Outline how the nominee is innovative and has contributed to improved outcomes. (100 words)

Entries must be submitted online via the website forms – go to www.AHAwards.co.uk/uk/ and follow the **ENTER NOW** links.
