Allied health professionals & healthcare scientists

The Academy for Healthcare Science award for Innovative practice to enhance patient safety

Sponsored by The Academy for Healthcare Science

This award aims to attract entries and nominations from healthcare scientists, clinical research practitioners and life science industry representatives who had a 'lightbulb moment', or who brought into play innovative approaches to long-standing problems or found unconventional solutions to unexpected challenges. How did this enhance patient safety and how did it inspire others?

It is open to healthcare scientists, CRPs and LSI representatives working in any setting in the UK.

Criteria

The judges will be looking for evidence of:

- Enhanced patient safety
- Benefits for service users, services and organisations including cost effectiveness
- Sustainability and transferability
- Leadership and team working
- Evidence of service user involvement..

Submission statements

1 Summarise the achievement and its significance (50 words).
2 Now provide a fuller description and relevant background work (200 words)
3 What are the outcomes and benefits in terms of patient safety? (200 words)
4 How does it demonstrate leadership and team working skills? (100 words)
5 How have you involved service users and communities? (100 words)
6 How could it be sustained and what is the potential for transferability and scalability across organisations or services? (100 words)

Entries must be submitted online via the website forms – go to **www.AHAwards.co.uk/uk/** and follow the **ENTER NOW** links.
